

My answers to the questions are as follows:

1. A privilege.
2. Rural areas should have more internet based training. In central Mass, I believe educators could visit small towns to conduct sessions with locals to reduce the challenges of transportation on the ones that need more education.
3. As in all programs and systems one must monitor, lead and manage to maintain quality. I would make sure the staff handling the services are the best available.
4. The truth is out there...keep searching and you will find it. You have all the tools and abilities to succeed so keep motivated and stay the course.
